

## OCR Scan Free Software

(Optical Character Recognition)

Dear "123 Gift For Me" Shopper,

Do you have a printed copy of a document that you want to edit, but don't want to re-type it? Just use OCR Scan software!

Place the printed document on your scanner, start the OCR Scan software on the computer connected to the software, then edit the electronic document in your word processor.

Here's a link to a free OCR Scan software that I personally use.

<http://www.simpleocr.com>

Happy word processing.

Cheers,

Paul Nisenbaum
