## Unadvertised Bonuses

## This Is Dedicated To All the Folks Who...

- have a desire to make extra money but are new to the world of online business and **don't know where to start**
- have started to explore some home business opportunities on the internet but have been bombarded by all the "sounds too good to be true" offers and **don't know who to trust**
- are convinced that making money on the internet is the way to go. . . but **you haven't found enough "step-by-step" instruction** on how to set up, grow and move into real profits successfully

**You're the reason for this book...** I've been where you are and I stumbled around for a long time, spent thousands of dollars trying this and that until . . . well just say, that I'm committed to helping you avoid all that. **There IS a proven path to success and that's where you need to make your journey.**

## With much appreciation to my home-based business mentors... I'm so glad I finally found you

An incredible woman, who went from being homeless, living in a car to becoming a 7-figure income earner and now leads tens of thousands of people around the world along a path to financial freedom.

The 'Doc' with a reputation of always, always over-delivering high-quality, time-tested, step-by-step-by-step instruction on how to build a strong, solid income on the internet.

The family man who teaches the techniques of the trade with simple brilliance, peppered with engaging homespun humor.

The soft-spoken young guy who just a few short years ago, could only afford \$5 a week for food (Ramen noodles and a carton of eggs). Today he generates \$50,000+ per month online and is teaching others to do the same.

### Lessons learned?

- Building a hugely profitable online business is not reserved for an elite few... the opportunity is waiting for anyone who wants to seize it
- Having a clear plan, laying a solid foundation and consistently following through wins out over grabbing for a quick buck...every time
- Success begins the moment you make up your mind!

*~ Dee*

# The Good News... the Bad News... and the Best News for Net Biz Newbies

## The Good News

There are literally HUNDREDS of legitimate ways to make money on the internet, no kidding. At this very moment, millions of folks are generating a very nice full-time income on the internet, while working part time hours from the comfort of their own home. These people set their own working hours, have a ton of spare time to spend with their family & friends and simply do things they love to do. As a matter of fact, many men and women are making 6-or-7 figure annual incomes and living lifestyles that rival entertainers and pro sports players.

## The Bad News

On the flip side, there are **tens of thousands** of people who venture onto the internet **each month** looking for a way to online riches. Unfortunately some folks get inundated with so many offers for money-making programs that they are too overwhelmed to take any action at all. Other folks end up chasing after “instant riches (with no work!)”, only to end up with empty pockets and worse of all, a mistaken belief that “this internet stuff is just a crock!” Still others, continue to stumble around without proper guidance, hopeful that some day, some way, they will find a money-making opportunity that will really work for them.

## The Best News!

With this newbie-friendly guide as **your starting point**, you will:

- Discover the fundamental keys to unlock your online success.
- Become familiar with the top high-profit, simple to start, auto-pilot business options that anyone can take advantage of.
- Quickly identify the specific internet profit system that is right for YOU so that you can begin right away!
- Reduce the risk of spending more money than you have to... just to get started
- Be directed to high-quality tools and trusted, no B.S. experts that will escort you along a proven path to success without breaking the bank!
- Learn how to start raking in your share of the trillions of dollars of online business

**“Your First 5 Steps to NetBiz Success”** will provide you with foundational information that if applied, will make all the difference in finding, growing and wildly profiting from a business you love. Fair Enough? Let's get started!

## WHY the Internet?

- **Over 1 Billion internet users (and growing)**
- **Trillions of dollars spent (annually) on the internet**
- **It's said that every 11 seconds someone starts a home-based business**

...which means that while you are sleeping, eating, going to school, working and playing...money is flowing into the pockets of “netpreneurs” (internet entrepreneurs) around the world...every second of every day. And as one expert puts it, “The internet is so big, and there’s so much money to be made that there’s plenty of room for anyone to join the system and start profiting from (its) power.”

## 7 Reasons People Decide To Start An Online Business:

### 1. High-profit potential

The profit potential of many online business systems offers an almost unlimited level of cash flow, when done right.

### 2. Low start-up costs and manageable operating expenses

Unlike a business in the “offline world,” an online business does not require a lot of start-up money especially if you already own a computer and have an internet connection. The on-going operational expense of running an online business can be managed according to your current budget. This means you grow and diversify your business in keeping with what you can afford.

### 3. The internet is a huge market (the whole world) and it's getting bigger by the minute

With a rapidly growing population of 1 billion+ Internet users worldwide, is there any wonder that this is an attractive platform in which to launch a business?

### 4. You can make gobs of money without having to physically store or ship an inventory of products ...unless of course you want to. You'll learn just how that's possible later in the guide.

**5. You can automate your online business then diversify to create multiple streams of income!**

With certain internet business models, you can automate operations so your business systems can operate 24/7 for you. Once you automate your internet-based business in some way, you can use the time you save to start another Internet Business, improve your existing business, or spend anyhow you like.

**6. No barriers to age, gender, ethnicity, economic/social status or educational background...**

People from all walks of life are able to stake a claim to internet “riches”: students, retirees, working moms and dads who want to stay-at-home with the kids, corporate execs, factory workers, truck drivers, nurses, teachers, artists, government workers, custodians, military personnel, you name it. And you may be surprised to know that there are a growing number of highly trained professionals like doctors, and attorneys, who are who are making the shift to “netpreneurship” as well.

**7. Your online business can be about your hobbies and/or passions**

Now, this is my favorite reason for anybody wanting to start an internet business! An internet business allows your passions and dreams to come to life, which is also the most important component of businesses of any kind.

You can work part-time, begin to generate income and eventually phase out of your job if you want. Or, your net business can serve as “growing” supplemental income if you love your job.

Thousands of people are discovering a new lifestyle and fulfilling their dreams each day. **Would you like to be one of them?**

If so, let’s move on to **Step 1** toward your Net Success...

## Step 1: Take a Personal Inventory & Examine Your MVP<sup>s</sup>

**"Decide what you want, decide what you are willing to exchange for it. Establish your priorities and go to work." —H. L. Hunt**

### Do you have what it takes to be a “Netpreneur”?

So you want to make money online...but do you have what it takes to be an e-entrepreneur?

The first thing you need to determine is whether you're cut out for this kind of work. Because the fact is, building a home-based business isn't for everyone. Honestly.

### 7 Questions to Ask Yourself

1. What do you really want?
2. Is your discontentment greater than your comfort zone?
3. How strongly do you want it? (Scale: 1 – 10)
4. Do you give up easily?
5. Do you have patience to stick with what you believe in even in difficult times?
6. Are you prepared to give an e-business the time, the work and the money it needs to get started and get growing?
7. What are you willing to trade to get your business up and running? \_\_\_\_\_Hours per week? Activities?

### Now it's time to examine your MVP<sup>s</sup>

Your ...Mindset...Vision ...Passions

#### **YEAH, But...**

Some people actually prefer having a boss who tells them what to do. They accept the routine of working a set number of hours, for a set salary, with a set number of days for vacation and sick leave. To them, it's about “stability.” My question to these folks would be: is there really job stability these days?

Some people want to escape the “rat race” but seek “safety” above all else. They are concerned about the risk of starting up their own business. They're not sure it's worth the investment of time and money, and they're scared of the responsibility that comes with venturing out on their own.

Stability and safety are very good things. My questions to the above two groups of people is this: **YEAH, BUT...** in your current circumstance, are you fulfilling your financial obligations without stress? Do you have time to enjoy life, family and friends? Are you able to give to those in need? Are you living the life you dream about?

## Developing a 'Success Mindset'

You should be looking to build a business toward the lifestyle you'd like to live...your business should not own you...you should own your business.

Here's where most folks miss the mark...really. People tend to want to hurry up and find out how to make the money before getting some things straight about themselves. **Get this:** Everything begins and ends with what you believe about yourself...

**A success mindset is YOUR responsibility!**

**Finding your center and creating the right mindset is the first order of business!** This is extremely important! Without it, you will have a difficult time finding success.

- You can have the best tools and strategies at your disposal. But if you have a poor attitude and mindset, those tools and strategies will not do you much good.
- If you want to succeed, you have to pull out all the stops and use all that you have. And your mind is the greatest asset you possess.
- If you are brand new to the Internet marketing world, you are extremely fortunate! Because, you have an opportunity here to start from scratch!
- You don't have to pick just another job and get stuck in it again. You have a chance to pick something that you actually enjoy doing!
- The only way is up from here. And that's what we will focus on. You can look forward to discovering what you're passionate about or what you're good at and do that!

Clearly outline a few rules to follow from now on, for example:

- I will realize that my failures are in my past. They're gone, old news. I'm not going to dwell on them or beat myself up over them. Today is a new day and I'm going to make a fresh start! I will simply learn from my mistakes and forge ahead!
- From now on I will focus only on success, optimism, solutions, and on moving forward.
- I am going to keep the negative people out of my life.

- I will remind myself that this is totally doable! There are people out there with much less resources than me that have created amazing successes on the Internet. If they can do it, I can definitely do it, too! All I need to do is to take action, pay attention to where I'm heading, improve accordingly...and persist!

If at anytime you begin to feel down, go through the above list again and get back in touch with what's real.

**Remember...**

You can have the best tools and strategies at your disposal. But if you have the wrong mindset, those tools and strategies will not do you any good.

Get your mind firmly focused in the right direction and the rest will fit into place!

## What is YOUR Vision of Success?

**We all have two choices: We can make a living or we can design a life. – Jim Rohn**

Success is not merely economic gains, titles, and degrees. Planning for success has to begin with your vision of what you'd like to accomplish...how you'd like to live.

### **With a profitable online business. . .**

- What kind of lifestyle do you envision for yourself and/or your family?
- Are you looking to make the kind of money that will pay off debts?
- Do you want to be able to financially assist loved ones or those in need?
- Do you want to build a long term, on-going income that will allow you to quit your JOB or carry you through your retirement years?
- Maybe you're already making decent money in your career but don't really have that precious thing called "time" to enjoy life. Maybe, just maybe, you feel stifled because you don't like what you're currently doing.

It's not enough to say, "I want a business so I can make lots of money."  
That's too shallow.  
You will fall prey to every "get-rich-quick" offer that comes your way

You see, only YOU can define what your ultimate success in this endeavor would mean to you.

**Take a moment right now and think about it.** Then write down your thoughts. Don't let this part scare you because it's ultra-important that you know exactly why it's worth starting your business.

Why is your 'vision' so important? Because your desire coupled with belief and determination is what will carry you through the long haul. And, it also serves as a touchstone by which your progress can be measured.

The clearer you are on what you're shooting for, the better your chances will be of hitting the mark.

A great source that cuts to the core of who you are and helps you discover with crystal clear clarity what your deepest desires are, can be found [HERE](#). Whether you decide to proceed with an online business or not ...this life-changing resource should be experienced.

## Find Your Passion and Play to Your Strengths

Lock yourself in a room, take the phone off the hook, take a few moments to relax. Get your mind into a calm, comfortable, relaxed state. Now. . . start making a list of all the things you enjoy doing...your interests and hobbies, all of your passions. Since you're starting from scratch, you might as well pick a subject (or business) that you would enjoy doing, right?

Be prepared to spend a couple of hours (if need be) on really pulling this information *out of yourself*. Think of what your ideal jobs or careers are. What have you enjoyed doing in the past? What were you good at as a kid? What are the things that really make you come alive? Add everything to the list. Don't worry about how you're going to make money doing those things yet. Just put together as thorough a list as you can.

See...when you think in terms of pouring yourself into your online business, you want to do what you enjoy, what you love.

**Pick the kind of lifestyle you want *first* - then build the business around that!**

Only after your list is done, should you think of turning those hobbies, interests and passions into a business

**Pick the top 5 choices** out of your list and think of how you can help others by doing them. For example, if you really enjoy hiking and that was one of your top 5 choices, you will learn later in this process, ways of turning that passion into a business.

**But just for fun, here's something to think about:** As a seasoned hiker, you have knowledge that can help others who are seeking information on hiking. You could, for example, share your tips about safety, a list of great trails to explore or even hiking gear to use.

The list you're working on in this exercise could be varied. In other words it does not have to be about a hobby. Your passion or skill could be showing people how to save money on taxes or restoring antique furniture or teaching folks about better health.

Someone once put it this way: If you were accidentally locked up in a bookstore overnight, what would you read about?

**When you do something you really enjoy doing  
and you find a way to help others while doing it,  
making money is just a natural end result.**

| **Side Bar** | There is another important ingredient in this step that is grossly overlooked or should I say "under-utilized." Without this ingredient, people will tend to lose focus and end up wasting a lot of time, energy and money when trying to build a business. We don't have room to go into it here but this ingredient is covered in the **full online version of this guide**. You are welcome to visit [findyournetbiz.com](http://findyournetbiz.com) for access. | **End Side Bar** |

So far, from **Step 1**, you've begun to lay a foundation that will determine your success, namely:

Your **mindset** + Your **vision** + Your **passions**

You are now ready to discover the TOP highly profitable online business options where you can **START SMALL** and **EARN BIG BUCKS**.

## Step 2: Explore the Top High-Profit, Low Investment Online Business Options

### Marks of a Good Internet Business Model

Establishing yourself on the internet is NOT about sticking up a website and waiting for traffic to automatically come to you. You must take an active role in that process. But let's first take a look at the marks of a good internet business model:

- **Profit Margin** – the higher the profit margin, the better.
- **Delivery** – can be easily delivered to your customers via a system.
- **Shipping/Handling Cost** – as low as possible or even none.
- **Marketing Strategy** – different online Business Models have different systems for marketing. You'll be choosing the model that has the best marketing strategy for your product or services.
- **Automation** – It's a big plus when you can automate the operations of your online business to the extent that you won't be bound by the number of hours you have in a day.

### The Top High-Profit Internet Profit Systems

As mentioned earlier, there are literally HUNDREDS of legitimate ways to make money on the internet. Some of them involve more TIME than money to run. Some of them involve more MONEY than time.

Some of them require you to have a very good writing ability. Some of them don't require you to write well or at all.

Some of them have many ways of making money, which may be what you're very keen on. Some of them only have one or two ways of making money, which you may prefer to avoid.

Not every Internet Business Model will suit everyone. The conclusion is this: different Online Business Models will appeal to different people. If you're ready to start your own net business, be sure to choose one that suits you best!

## **Think of the following as “Entry Points” to the world of Online Business**

This section will present a **brief overview** of the **top broad-based online profit systems**.

Remember, within each of these areas, there are numerous ways you can diversify as you grow...you are not limited. So watch for the clues.

Ready? Here goes...

## Profit System: Online Auctions

At last count, there are more than 250 online auction sites...but none, absolutely none of them remotely compare to **eBay™**.

**If you haven't heard of eBay, let me be the first to say, "Welcome to Planet Earth."**

From tennis balls to vacation timeshares, from luggage to iPods, from vintage wear to digital downloads, from rare coins to bicycles, automobiles and boats. . .you can find "it" on eBay. Remember we mentioned earlier about "systems" and automation? Well, eBay is a well-oiled machine. That's why there is a growing community of over 80 million registered users.

Here's an excerpt from eBay's website:

"The eBay Marketplace creates a powerful online platform for the sale of goods and services by a passionate community of individuals and small businesses. On any given day, there are millions of items available through auction-style and fixed-price trading. With millions of buyers and sellers worldwide, eBay offers localized sites in more than 20 countries."

### Take heed to what the experts say

about building a business using online auctions as a profit system.

A 10 yr. eBay veteran who generates hundreds of thousands of dollars in annual revenue has authored what is considered the "**bible**" of net auctions. This extensive step-by-step tutorial & action plan is your ticket to big-time profits! The great news is: we've arranged a **complimentary copy** for you. You can pick it up at [findyournetbiz.com](http://findyournetbiz.com)

### Meet 3 eBay-ers

**Khari:** lives in a tiny apartment but likes the idea of selling new products related to her passion for exercise and fitness. So she did some research to determine hot-selling equipment and has arranged to have her orders filled by drop-shippers.

**Jon** loves to collect...stuff. His wife threatened to leave him because there was so much "stuff" stacked in the spare bedroom, in the hallways, on the patio and in the garage. Did eBay save a marriage? Well let's just say that it provides an outlet for Jon to collect and sell, collect and sell...

**Vigo** discovered the no-hassle world of digital downloads. He researches what people are looking for and supplies informational products (software, ebooks) which mean no shipping and instant product delivery to anyone around the world.

**Pop Quiz:** Which of the above seem to be maximizing this business model?

Get the full case study at [findyournetbiz.com](http://findyournetbiz.com)

Profitability Meter
<b>HIGH</b>

<b>Yes; Very</b>

## Profit System: Affiliate Marketing

**Affiliate Marketing** involves revenue-sharing arrangements where merchants will pay you a commission for sending them customers. You refer people to different websites that sell products or services and if the people you refer make a purchase, you get a commission.

As an affiliate marketer, you are enabled to sell other people's products or services for a percentage of the sale. Your job is to get traffic (ready-to-buy prospects) to your affiliate's website. Because of this arrangement, you are free to "represent" and refer virtually anything online.

### An Affiliate Example...How It Works

Let's say that you've created a fun site about New York City. Tens of thousands of people search for information on all kinds of topics on New York, every day... "Broadway Plays" or "New York Mets" or "Central Park"... etc., etc.

They find your site... They read your pages, enjoy your content, and check out your recommendations. And so...

They click your link to go to TravelNow.com to book a cheap flight. **You get paid a commission.**

And they click your link to AllHotels.com and book a hotel room. You receive **another commission.**

Finally, they click your link to Amazon.com to buy a New York tour book and street map. **Yup, one more time on that commission!**

Getting the idea?

Courtesy of: [SiteSell\[dot\]com](http://SiteSell[dot]com)

Note there are many other ways to promote an affiliate's product or service, some of these methods don't even require a website... A great option for a newbie to get started.

**Take heed to what the experts say** about building a business using affiliate marketing as a profit system:

**[Take advantage of this FREE \(but highly-prized\) course](#)** and learn how to become a high-earning affiliate champion... Excellent information!

<b>Profitability Meter</b>

<b>Yes</b>

## Profit System: Information Marketing

[includes Information Publishing, eProduct Creation & Distribution]

The broadest of online profit systems and some say the “granddaddy of them all!” Meaning, if done right, will generate almost unlimited auto-pilot income. One reason is that this category includes all manner of digital information product creation and publishing and utilizes a wide range of marketing methods: affiliate marketing, direct sales, viral marketing and more.

Ever do a search on the internet for a particular topic and you came across a site that provided a lot of valuable information? So much so that when you wanted to read more on your topic, you returned to that site? And in some cases, you might have made a purchase based on that site’s recommendation. Well that’s only one example of a “content” site that is using information marketing to earn your business or support.

Now, you may be thinking...”didn’t you just give this kind of example in the Affiliate Marketing page? You’re very keen and yes, this is an example of how the two intertwine.

### Example

#### **In A World Where Information Is Currency An Infopreneur Can Build A Business**

Publish your knowledge (from your hobby, job, past-time, previous experience, etc.) into a theme-based content site that generates an income stream... then another. Keep adding relevant revenue models until you have a stable, diversified and highly profitable Web-based, infopreneurial business.

**How?** Convert knowledge into information by putting it on the Web. The information attracts targeted visitors who convert into income, without any need to deal with an actual customer.

And that is the very definition of "infopreneur"... real income from a real business. Your information-based business develops into a stable, safe, diversified, substantial and profitable business, based upon **multiple streams of income.**

**I know, I know...**you're wondering how can you possibly supply a bunch of information when you don't like to write. **Not to worry**, you'll learn just how you can run a very profitable information business without being a good writer.

The variations within this profit system are so numerous; justice can't be done to it in this guide. But here's a brief list of products/services that fit in this category:

- Content (Informational) websites
- Electronic-Newsletters or e-zines
- ebooks, eReports, eCourses
- Audio/Video enhanced eProducts
- ...and other information-based services

**More in-depth information** is available at [findyournetbiz.com](http://findyournetbiz.com)

## **There you have it...**

Again, there are many ways to generate income on the internet. However, for the purposes of this guide, we wanted to present the **TOP 3 High-Profit, low investment options**. Additional netbiz ideas can be found at our website.

## **Let's re-cap...what you have accomplished so far**

**Step 1:** You took a personal inventory and examined your mindset, vision, passions and strengths

**Step 2:** You were presented with the TOP most profitable online business models and read what some experts had to say

Now you should be ready to move to Step 3!

## Step 3: Choose the Entry-Point That's Right for YOU!

**The achievement of your goal is assured the moment you commit yourself to it.**

**—Mack R. Douglas**

### **Time to take another little assessment...**

**Question:** If you felt confident that you would receive the proper training...

Which of the three high-profit business options appeal to you, based on what you discovered about yourself in Step 1? (Note: The answer to this question is not set in stone. We're just trying to establish a reference point that will enable you to track to more information, training and guidance). So... of the three business options presented in Step 2, which are you leaning toward?

#### **I'd like to learn more about:**

- The eBay Auction process
- Affiliate Marketing (making referrals to other people's products/services)
- Offering entertaining or informative content to viewers on a website while making money from advertisements placed on your site. Or,
- Creating or publishing my own digital information products (which I can even have my own stable of affiliates who sell for me).

#### **Still a little unclear about which route you'd like to explore further?**

Remember, you can **get more insight** about each of these business options (and how to match them to your findings in Step 1), in the full online version of this guide at the [Find Your Net Biz](http://www.findyournetbiz.com) website.

Now, just a quick second before we move on...

**Joshua Shafran**, an internet marketing mastermind, uses this simple formula in his teachings:

Right Info/Knowledge **X** Your Understanding + Action = **Breakthrough Success!**

**“You have two choices how you get the experience...  
trial and error or coached by an expert”**

Which brings us to the next step...

## Step 4: Pursue Your Net Biz Goals Along a Proven Path

**If you want to earn more...you have to learn more...of the right stuff...and then put it into ACTION!**

Once you have an idea of what you want to pursue, it's time to find a teacher, mentor, trainer, expert to help shorten your learning curve...and take you where you want to go.

If you choose to follow a proven path that will quickly and simply get you to your destination, you will **avoid the trap** so many, many people fall into. That is, spending far too much time and money trying to find their way through the net biz jungle. Oh, there are riches to be found for sure...and there's enough for everyone. So wouldn't you rather have an experienced guide to lead the way?

[Rosalind Gardner](#) is another well-known "master" internet marketer that has much to say about your internet business success. Here's an excerpt from one of her articles.

"In summary, here's a prescription for your Internet business success. Get a balanced diet of advice by selecting information from all the major gurus.

Read it, digest it, then pick one guru in every major area to follow.

Choose your guru based on your sense of trust in that person, and on the advice of others.

The value you get from learning from more than one guru comes from picking up on their special techniques... and every 'guru' has got 'em.

So, pick a guru from whom you'll learn and then apply the basics.

Then invest in other materials to 'round out your education' and put more tools in your tool chest."

**When you are willing to learn (and apply yourself),  
and if you have the right teacher... you WILL succeed.**

Sometimes the problem is finding the “right” teacher. There are lots of people on the Internet who promise the moon but deliver a sack of desert rocks. (I know, I have a big pile in my backyard!)

[Find Your Net Biz.com](http://FindYourNetBiz.com) is committed to presenting quality newbie-friendly start-up resources that won't break the bank. Based on personal experiences as well as much research, we're intent on sharing information about some of the top trainers, business mentors and experts who have a reputation of offering effective, step-by-step training and tools at very affordable costs.

## **Why Invest in Your Personal Development?**

**“Your attitude determines your altitude”**

**Understand this now. Your personal development is KEY.**

Success is a very personal journey and you would be wise to invest in your own development as a person.

By making a commitment to YOURSELF, you should spend time (from this day going forward) learning and building into yourself... and you'll reap the rewards of your personal development for years to come.

You're probably already aware that first-rate personal development coaching can literally cost thousands of dollars...and it is well worth it. However, if you're on a tight budget, here is affordable “success training” at a fraction of the cost. From the comfort of your home, you can CLICK, LEARN and APPLY your way to success in any area of your life, by simply [watching motivational and achievement presentations](#) via the web 24/7. If you hurry, the 14-Day FREE trial offer may still be available.

**A growing list of affordable personal development resources** is available at [findyournetbiz.com](http://findyournetbiz.com)

## Step 5: Get “Growing”

**"The truth of the matter is that there's nothing you can't accomplish if:**

**(1) You clearly decide what it is that you're absolutely committed to achieving, (2) You're willing to take massive action, (3) You notice what's working or not, and (4) You continue to change your approach until you achieve what you want, using whatever life gives you along the way."**

**— Anthony Robbins**

You're smart enough to know that no successful business can be built without an investment of time, money, dedication and absolute commitment. Is it worth it? You bet!

Remember... the beauty of the internet is that it can be used to build a money-making machine that works 24 hours a day...7 days a week. Right now it's pouring cash into the pockets of “netpreneurs” around the world. Trillions of dollars are being spent and tens of thousands of folks are experiencing new lifestyles because of it.

**Just imagine...** owning your own internet business and each time a customer makes a purchase, money is automatically put into your account... even if you're asleep. **Imagine...** working from home according to your own schedule and pocketing all the cash (less expenses) that your business generates. **Imagine...** building your business to such a level that you only need to work just a few hours a week to maintain what you've built... yet still bring in “thousands” of dollars a month continuously.

**Well, hold that image in your mind as you get to work...and get “growing.”**

**So now what?** See the next page...

**You are cordially invited** to continue the process of learning how you can claim your share of online riches.

Visit the [Find Your Net Biz](#) website.
